Callum Basnett

Junior Software Developer

Work Experience

Junior Developer
School of Code
February 2024 to present

- Completed an intensive 16-week full-stack web development program
- Learned a huge amount of new skills in a very limited timespan
- Built proficiency in JavaScript, React, Node.js, Express, HTML, CSS
- Set up SQL backend using Supabase
- Practiced version control and collaboration using Git
- Employed an agile/scrum development methodology
- Gained experience with tools like VSCode, Figma and Supabase
- Planned, wireframed, developed, and deployed multiple web applications from concept to production
- Worked on a final project showcasing full-stack abilities
- Partnered with fellow developers through pair programming exercises

Education History

Bedlingtonshire Community High School
10 A*-C GCSEs

Relevant Skills

- JavaScript, TypeScript, next.js, Git, HTML, CSS, SQL, React, Playwright, Jest, RESTful APIs
- Ability to learn new languages, libraries, **fast**
- Full Stack Coding
- Software Testing
- Technical Documentation

About me

From a young age, I possessed an innate curiosity and passion for how technology works under the hood. I found myself drifting through life, never quite feeling fulfilled or able to tap into my true interests.

It was this prolonged period of searching that allowed me to hone invaluable skills in communication, creative problem-solving, and providing exceptional user experiences.

Realising I risked leaving my true calling unfulfilled, I enrolled in School of Code's intensive coding bootcamp. Through hundreds of hours of diligent study, I've gained comprehensive full-stack development abilities.

I now eagerly look forward to embarking on a rewarding career where I can finally unleash my technical talents to craft elegant, user-friendly software solutions. My background has instilled a robust work ethic, adaptability, and desire to continually learn more. Coupled with my customer-facing acumen, these traits will propel my success as a junior developer.

Past Experience

Aioi Nissay Dowa Europe
Customer Advisor
- Displayed expertise with CRM systems and data handling while addressing insurance queries
- Communicated complex policy details clearly to provide seamless customer experiences
- Collaborated with claims and external teams to resolve issues
- Kept call flow script up to date using HTML, CSS and JavaScript

Teleperformance
119 Agent
- Fast paced contact centre environment
- High pressure as customers are understandably worried about the pandemic and the job requires emotional intelligence, adaptability and good teamwork skills.

Remondis
Sales Administrator
- Gained experience across account management, administration, operations, and customer service areas
- Subcontracted work to external vendors
- Reported sales results to head of sales
- Unofficially provided IT support to coworkers
- Assisted in in tendering.

Hobbies

- Vehicles (DIY mechanic - interest in restorations)
- Gaming
- Music (would like to learn to DJ!)
